- **Papers 104-118:** Conceptual foundations for the fifth epoch; the revelators compose the highest achievements of human theology and philosophy into a platform upon which further growth may take place. This involves a revealed integration of Trinitarian and Process theologies. If it is felt that the revelators had a specific purpose in ordering the Papers, the student might ask why the gap in the material in this section between that related to the Trinity and that related to the Supreme is bridged with a discussion of the Thought Adjusters and the Seraphim of Planetary Supervision.
 - **Papers 104-106:** Some understandings from which an advanced religious cosmology might be developed.
 - **Papers 107-112:** A revelation of some ontological realities supporting the development of a deeply enriched spiritual life.
 - **Papers 113,114:** A revelation of the nature of superhuman assistance available for the advance of civilization.
 - **Papers 115-118:** The Supreme Being -- some understandings upon which advances in process theology might be based.
 - **Paper 118:** A conceptual springboard from which future advances in spiritual cosmology and theology might be developed. This paper, in the way in which its concepts are presented, also models a philosophical approach to the integration of further developments with present attainments, based upon the approach put forth at [19:1.6] (p. 215): "The true perspective of any reality problem--human or

divine, terrestrial or cosmic--can be had only by the full and unprejudiced study and correlation of three phases of universe reality: origin, history, and destiny. The proper understanding of these three experiential realities affords the basis for a wise estimate of the current status."

- **Papers 119-195:** A narrative revitalization of the meanings and values which constitute the ethical, moral and spiritual foundations of human culture -- the life and teachings of Jesus.
